PROFESSIONAL SUMMARY

Analytical and solution-oriented Data Analyst with experience in transforming real-world business challenges into structured data-driven solutions. Developed the ability to handle end-to-end analytics, performance tracking, and decision-support reporting. Skilled in developing analytical logic, building data models, and collaborating with cross-functional teams to drive data-informed improvements in business performance.

EDUCATION

Postgraduate Diploma (Management) XLRI Delhi-NCR	2023 - 2025 Grade: 5.65/8.0
Bachelor of Technology (Computer Science) College of Engineering Trivandrum	2018 - 2022 Grade: 9.64/10.0

EXPERIENCE

Data Analyst September 2025 - March 2026
Skope Kitchens Bengaluru

- Contributed to **98.8% growth in net revenue between Sept 2025 - Feb 2026**, while **order volumes doubled**, by providing performance tracking, operational insights, and decision-support reporting.
- Owned end-to-end **analytics and reporting for 12 brands**, tracking key operational and business KPIs including **FCR, KPT, sales performance, purchase trends, cost analysis, and Swiggy/Zomato aggregator performance**.
- Worked cross-functionally with operations, procurement, and culinary teams to **reduce Food Cost Ratio by 15%**, through continuous monitoring, item-level analysis, and process improvements.
 - Conducted **item-level profitability and performance analysis**, identifying high-impact products and recommending resource allocation strategies to maximize operational efficiency.
 - Redesigned the **food cost analysis model**, incorporating previously unaccounted operational factors to improve the accuracy and reliability of FCR calculations.
 - Participated in **new product sampling and feedback evaluation**, ensuring target benchmarks for **cost, market positioning, and quality standards** were met during product development.
- Collaborated with the in-house **tech team** to design business logic for internal software modules, translating operational workflows into structured **Excel/Google Sheets models** for system development.
 - Participated in product brainstorming and review cycles, providing insights on **ground-level operational processes** to improve system functionality and bridge process gaps.
 - Developed internal tools such as a **raw material consumption calculator**, enabling ingredient-level consumption estimation from sales data and improving inventory visibility beyond ERP capabilities.
- Managed and mentored a **3-member analytics team**, ensuring accurate data capture and documentation during **new product development and SOP preparation**.
- Supported **client onboarding and training**, explaining operational KPIs, assisting with food cost analysis during trials, and customizing base analytical models to meet client requirements.

CERTIFICATIONS

GATE 2021 CS IIT Bombay ([Link](#)) March 2021

- Secured **All India Rank (AIR) 90** with a **score of 856** in GATE 2021 (Computer Science and Information Technology).
- Validated advanced **analytical, problem-solving, and quantitative skills** through a highly competitive national exam.

SKILLS

Computer Language: SQL
Databases & Data Tools: Excel, MySQL, Power BI
