- Built **KPI dashboards and monthly reports** (impressions, sessions, leads) in Looker Studio, Google Analytics and Advanced Excel for performance tracking.

- Delivered **data-driven recommendations** to improve search visibility, user engagement, and content relevance.
- Led **website architecture revamp**, enhancing user journey and **increasing lead generation and conversions**.
- Mentored team members and interns on SEO analytics, technical audits, and reporting frameworks.

SEO Executive

Five Feed E-Learning Solutions

August 2020 - December 2020

Mumbai, Maharashtra, India

- Executed on-page and off-page SEO strategies (content optimization, link building), improving visibility and domain authority.
- Collaborated with content teams to develop SEO-friendly content, enhancing relevance and user experience.
- Monitored website performance using Google Analytics, identifying trends and optimization opportunities.

SEO Executive

iBridge Digital

May 2018 - June 2020

Mumbai, Maharashtra, India

- Managed SEO strategies for 6–7 international clients (UAE, US, India), delivering customized solutions to improve rankings and online visibility.
- Led and trained a team of SEO trainees & interns, overseeing on-page and off-page execution to meet client performance goals.
- Optimized website structure and performance using HTML/CSS, improving user experience and search engine crawlability.
- Collaborated with clients and cross-functional teams, delivering performance reports and data-driven recommendations for continuous improvement.

SEO Executive

RupeeBoss Financial Services Pvt Ltd

January 2017 - May 2018

Mumbai, Maharashtra, India

- Executed technical and off-page SEO activities (GSC error fixes, sitemap management, link building), improving site performance and search visibility.
- Supported digital marketing initiatives, including social media optimization and content promotion to drive brand awareness and engagement.
- Performed website testing and basic performance analysis, identifying issues and contributing to optimization efforts.

PROJECTS

Capstone Bank CRM Analysis Dashboard - Power BI ([Demo](#))

October 2025

Tools: Power BI, Power Query, DAX, SQL, Excel

- Built an end-to-end CRM analytics dashboard to track total, active, inactive, retained, and exited customers across years and locations.
- Created DAX measures to calculate KPIs such as active customers, churned customers, credit card holders, and retention metrics.
- Analyzed customer activity trends over time to identify seasonal drops and growth patterns in active vs inactive customers.
- Performed customer segmentation based on credit score, credit card ownership, gender, geography, and number of products held.
- Evaluated churn and retention patterns using customer risk profiles and product penetration analysis.
- **Recommendations:** Focus retention strategies on high-risk inactive segments, increase credit card adoption among non-card customers, and target multi-product customers to reduce churn.

Chinook Music Store ([Demo](#))

July 2025

Customer Risk Profiling and Churn Analysis using SQL

Tools: SQL (Joins, CTE, Window functions, Aggregations, Conditional formatting)

- Analyzed customer purchase behavior and revenue patterns across genres, artists, and locations.
- Used SQL Joins & CTEs to identify top-paying customers, high-value segments, and frequent buyers.
- Applied Window Functions to calculate revenue rankings, average spend, and customer lifetime value.
- Compared performance across media types, playlists, and markets to find profitable categories.
- Created insights on low-performing genres and revenue leakage areas.
- **Recommendations:** Focus marketing campaigns on top-spending customers, promote high-revenue genres (Rock, Latin), and bundle low-performing tracks to increase sales

Zomato Restaurants Expansion ([Demo](#))

June 2025

Zomato Restaurant Explanation - Advance Excel

Tools: Excel (Pivot Tables, Lookups, Dashboards, Conditional Analysis)

- Analyzed restaurant data across cities to identify high-demand and low competition zones.
- Used Pivot Tables to evaluate restaurants count, cuisine popularity, order frequency, ratings, and customer preferences.
- Identified top-performing restaurant categories and under-served cuisines across cities, average price for two and price range affordability.
- Conducted profitability and feasibility analysis to determine which cities are most suitable for new restaurant expansion.
- Highlighted operational challenges such as low rating clusters, correlations between table booking, online delivery.
- Recommendations: Expand into high-demand Tier 1 areas with lower competition; introduce trending cuisines in untapped zones; improve presence in cities showing high repeat orders. Initiate localized offers and promotional activities.

CERTIFICATIONS

Excel Using AI AI for Techies ([Link](#))

April 2026

Key takeaways:

- Faster data analysis using AI
- Simplifying complex formulas
- Generating insights with minimal effort

Python Using AI AI for Techies ([Link](#))

April 2026

Key takeaways:

- Writing smarter code with AI assistance
- Automating repetitive data tasks
- Understanding how Python fits into real-world data analysis

Professional Certificate in Data Science Newton School

April 2025

- Developing strong foundations in SQL, Advanced Excel, Power BI, and Python (Pandas, NumPy)
